

Established in 1978, **Prevost** has built its activity around a range of products for compressed air distribution, including our flagship product, the push button quick coupling.

We have regularly extended our range around this product to cover all fluid distribution needs (compressed air, water, oil, gases).

The **Prevost** catalogue today contains all the items needed for connection, distribution and treatment of fluids.

We work continuously to improve the quality, efficiency and safety of our products, to meet growing market expectations and requirements.

Innovation and safety are at the heart of **Prevost's** product development strategy. Accordingly many of our products are patented, and comply with various international standards (ISO, EN, DIN).

Our know-how is applied to serve all users of pneumatic and hydraulic energy in industry, the automotive sector including garages and body shops, public works, wood, welding, agriculture, food processing, road services... the list is endless.
